

AUTOMATIC VOLTAGE REGULATOR AVR PRO 30000 (30000VA) 3% 3F

AVR PRO 30000VA 3% 3F:
INDEKS: 5AVX3F0300
EAN: 5904100450664

The AVR PRO 30000 VA3% 3F automatic voltage regulator combines the features of 2 devices: a voltage regulator and surge protection device.

The most important features:

- Stabilizes the voltage supplied at the stabilizer input
- Automatically reduces too high mains voltage and raises too low mains voltage to the appropriate level
- Protects connected devices against damage. If the voltage increases and exceeds a safe value, the stabilizer will automatically disconnect the device from the network, protecting it against damage
- Works with power generators
- It suppresses interference introduced into the electrical network by other devices
- **It works in three-phase mode**

What makes the AVR PRO 3F special among other automatic voltage regulators?

PRO version with an innovative device. A special service build-in mechanism allows to use of a very small tolerance of voltage - 3%. It means that the output voltage will be very close to the target value, with the deflection of only 3%. This is very important concerning the sensitive electronic devices.

AVR PRO 30000VA 3% 3F

AVR PRO 30000VA 3% 3F

Main technical data:

| MODEL | AVR PRO 30000VA 3% 3F |
|---------------------------------------|---|
| Power | 30000VA |
| In voltage range | 225-450VAC |
| Input voltage range for 1 phase | 130V - 260V |
| Minimum starting voltage | 225V±5V |
| Out voltage range | 400V |
| Phases | 1 phase / 3 phase |
| AVR stabilization precision | 3% |
| Start delay switch | 6s |
| Frequency | 50Hz |
| Protection | High/low voltage protection, overload protection, high temperature protection, circuit protection |
| Dimensions/Weight | 541x302x427mm/53kg |
| Gross dimensions/Gross weight | 645x400x650mm/66kg |
| Multipack dimensions/Multipack weight | 645x400x650mm/66kg |
