

LITHIUM BATTERY + BMS

LiFePO4 12,8V 100Ah (100A) + LCD

INDEKS: 6AKLI10L12

EAN: 5904100450893

LiFePO4 (Lithium Iron Phosphate) batteries with integrated BMS are characterized by very low weight and a large number of cycles (about 6000 cycles at DoD 60%).

Thanks to high cyclicality and very low self-discharge, LiFePO4 battery is perfect, both in emergency power systems and in OFF-GRID installations. Low weight allows the device to be used in installations in vehicles (campers, foodtrucks) and boats.

Built-in **BMS system** ensures battery storage without loss of nominal capacity for a long time and controls the processes of charging and discharging the battery.

The battery is equipped with an LCD display that shows the most important parameters.

What devices can be powered by LiFePO4 battery?

Emergency power supply systems

OFF-GRID systems

Vehicle installations (campers, food-trucks)

Boat installations (ONLY using a hermetic case for the battery)!
