

SMART BATTERY CHARGER

12V 40A Automatic 7-stage

SMART BATTERY CHARGER 12V 40A Automatic 7-stage is compact smart battery charger uses the latest switch-mode technology and it designed particularly to charge different batteries in dual battery system to their best level.

- Main features:**
- The automatic 7 stage charging algorithm delivers a more efficient and full charging without the issue of voltage drops.
 - The boost-charging helps to activate the battery status and wake up discharged battery to a suitable recharging level.This also improves the charge delivered to your battery, increases the service life of battery and prevents premature battery failure.
 - This smart battery charger can be used to charge GEL/AGM/LiFePO4 by pressing the BATT button.
 - This smart battery charge can also operate as a 12V 40A power supply (selectable voltages 13,2V, 13,4V, 13,8V).
 - Built-in protections: overvoltage, overcurrent, short-circuit, reverse-polarity.
 - Durable enclosure.
 - Compact dimensions.

Main technical data:

MODEL	12V 40A 7-stage
Charging current	40A
Input voltage	190–265V AC ~ 50Hz
Output voltage (12V)	13,2V, 13,4V, 13,8V
Suggest battery capacity	40–300Ah
Ambient temperature	0°C do 40°C
Dimensions	32,1x15,7x9,5cm
Weight	2450g
Gross dimensions	41,5x25,2x14,8cm
Gross weight	3390g
Multipack dimensions	43x52x47cm
Multipack weight	14,7kg
