

ELECTRIC OUTBOARD VOLT POLSKA

WICHER 70

INDEKS: 3ZSIL65LBS

EAN: 5904100451807

The outboard electric motor **Bryza 70** is designed to power boats and operate in shallow water. Due to the column strengthened by composite material, the device is resistant to impact and deformation.

When working with this type of engine powered by **12V, AGM and GEL batteries** with appropriate capacity are the best to choose from (the battery must be able to supply the engine with a current of 15A-70A).

Low weight, easy assembly and quiet operation of the device. All essential engine parts are contained in a compact unit.

Main features:

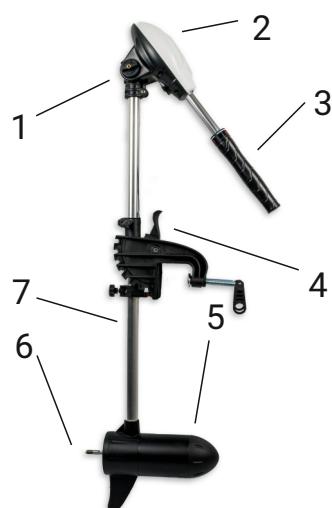

Extendable handle feat. forward/reverse option/speed control
5 forward/ 3 reverse speed
3 blade propeller
LED display showing the voltage of battery (W)
Powered by AGM/GEL battery
Column strengthened by composite material
Quick and light installation
Quiet work

Usage of product:

Motor boats
Fishing boats
Sailing boats

Technical data:

Power	800W +3%
Power voltage	12VDC
Max current	70A +3%
Weight	9kg
Dimension/Weight single package	116/38/18cm / 10,5kg
Dimension/Weight collect package	25CMB / 3185kg

1. Control box
2. Battery voltage display
3. Extendable handle feat. forward/reverse option/speed control
4. Quick tilt device
5. Motor
6. 3 blade propeller
7. Multi adjustable depth feature
